

# Class 1 – Science – Classification and identification of local and common plants

Concept: Evolution—Understand evolution, reproduction and how living things have adapted over time.

## Vocabulary

**petals**— are the colourful rings around the centre of the flower.

**stem / trunk** — stems support leaves, flowers, and fruits. They carry water from the root to the rest of the plant.

**root**— holds a plant in place and soaks up water.

**deciduous** — loses its leaves in the winter.

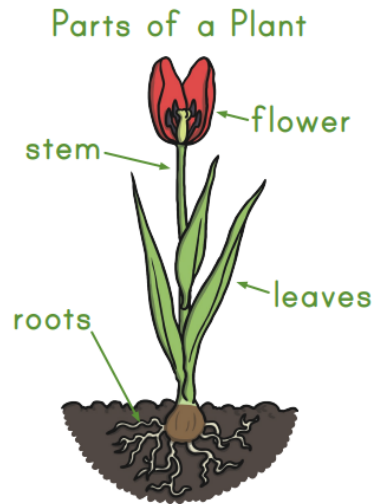

**evergreen** — keeps its leaves all year round.

Evergreen tree

Deciduous tree

## Wild Plants

## Plant Identification Key
